6

Dear Mr. Reilly:

This letter is in reference to the application from the Ethyl Corporation for a waiver to market the gasoline additive HiTEC 3000 nationwide. I want to request that the Environmental Protection Agency give this product a prompt and thorough evaluation. If HiTEC 3000 is as effective as the Ethyl Corporation claims, it will be a real asset assisting us to clean our air of pollution created by automobile emissions.

I spent 35 years with the Atlantic Richfield Company before retiring in 1985. During this period, I had many occasions to work with the Ethyl Corporation on numerous gasoline additives. They were one of the most reputable concerns I had the pleasure of working with and their products were superb. If they have a new product that will reduce automobile emissions, I feel it will be successful and should be available to the industry. For this reason, I feel we should not delay the evaluation for approval. Please expedite this request if at all possible.

Thank you very much for your assistance and I would appreciate your reply and notification if the product receives EPA approval.

Sincerely,

*Jim Miller*
